\*\* Asked of one-half the respondents (FORM B).

- 6a. There is a proposal to establish education savings accounts, which would allow parents to set money aside in accounts that could earn interest tax-free to then be used for educational expenses including tuition at private schools. Supporters say this would help give more parents the chance to send their children to a better alternative to public schools. Opponents say it will take funding away from public schools and still won't be enough to help poor families pay for private schools.

Do you favor or oppose these education savings accounts? \*

\* Asked of one-half the respondents (FORM A).
